

Emergency Preparedness & Hazmat Response Conference

Co-Sponsored by Baltimore LEPC and U.S. EPA Region III

The Nation's Premier All-Hazards Conference for Government and Industry with Quality Education, Training, and Networking

November 7-10, 2010
Hyatt Regency Inner Harbor • Baltimore, Maryland

ADVANCE BROCHURE

www.2010conference.org
Conference Hotline (800) 364-7974

A conference for local emergency planning committee representatives; environmental, emergency and safety staff from federal facilities; environmental, health and safety, and operations representatives from industry; first response personnel from fire, emergency medical, and law enforcement agencies; state emergency response commission members; hazmat response teams; emergency managers and planners; regulatory compliance specialists; emergency medical personnel; medical, safety and environmental personnel from hospitals; maritime industry personnel; transportation and distribution industry personnel; power and utility industry staff; safety and environmental personnel from colleges and universities; counter-terrorism professionals and specialists.

Hosted by the City of Baltimore, the City of Annapolis, Anne Arundel County, Baltimore County, Carroll County, Cecil County, Harford County, Howard County, the Maryland Emergency Management Agency, and the Maryland Department of the Environment

Keynote Speaker:

“Behind The Blind Side: Overcoming Obstacles in the Face of Adversity”

Sean Tuohy

Entrepreneur, NBA Broadcaster & Subject of “The Blind Side”

Monday, November 8, 2:00 PM

“Sean was an American success story; he had come from nothing and made himself rich,” wrote Michael Lewis in *The Blind Side*, the best-selling book that inspired the major motion picture starring Sandra Bullock and Tim McGraw. *The Blind Side* tells the story of Michael Oher, a homeless teenager turned first round draft pick NFL football player, with the support and love of an unlikely adoptive family: the Tuohys. The Tuohy family’s life, as chronicled in *The Blind Side* went on to become a record-breaking Hollywood blockbuster that earned more than \$300 million at the box office and became the number-one opening weekend for a sports film in history.

Sean Tuohy, Michael’s adoptive father, was a record-breaking basketball player before becoming a successful entrepreneur and NBA broadcaster.

Sean Tuohy knew what it meant to be the poor kid in a private school—he had been one himself. With sports as his “meal ticket” through high school and college, Sean left New Orleans for the University of Mississippi on a basketball scholarship. When Sean walked off the court after his final game, he had shattered every major SEC assists-related record and become a legend in the SEC hall of fame for leading the Ole Miss Rebels to their first and only Championship.

Drafted by the NBA’s New Jersey Nets in 1982, he opted to continue his career overseas before returning to the US to be with his father in his final days. He became a successful entrepreneur, building a company that now owns and operates 70 fast food restaurants, including Taco Bell and Long John Silver’s.

Sean is also in his ninth season as an NBA broadcaster for the Memphis Grizzlies, after several years as an analyst for radio broadcasts at Ole Miss as well as national broadcasts for Westwood One and CBS radio.

Conference Location

The Inner Harbor is Baltimore’s showcase. Numerous eateries and shops are located in the two glass-enclosed pavilions of Harborplace, just steps away from the conference hotels. At either end of the Inner Harbor district, there are numerous artistic, culinary and entertainment attractions. Places not to miss include the National Aquarium, B&O Railroad Museum, the Maryland Science Center, the Baltimore Maritime Museum, and the Sports Legend Museum. Baltimore is easily accessible by car, train or plane.

For more attractions and information, visit www.baltimore.org.

Hotel Reservations

Make your reservations by the hotel’s cut-off date to ensure you receive the conference room rate. Identify yourself as an attendee of the 2010 Emergency Preparedness Conference.

Hyatt Regency Baltimore

The Hyatt Regency Baltimore is located at 300 Light Street. Perfectly situated on downtown Baltimore’s picturesque Inner Harbor, the AAA Four-Diamond Hyatt Regency Baltimore offers exceptional luxury, attentive service, and thoughtful amenities. Baltimore’s best attractions and entertainment venues are just a short stroll away.

Rooms are available at \$144 per night plus 13.5% tax for single and double occupancy. Rooms are available at this rate until the room block is full or the deadline for room reservations of October 28. A special conference parking rate is also being offered of \$14/night for self parking.

For reservations at the Hyatt Regency, call 402-592-6464 and identify yourself as attending the 2010 Emergency Preparedness Conference. If you have any problems with hotel reservations, call the Conference Hotline at 800-364-7974, and we’ll be glad to assist you.

Registration Fee

The registration fee is \$275 or \$250 for three or more attending from the same organization. All multiple registration forms must be received simultaneously.

Registration includes:

- A variety of training programs (pre-registration is required and limited seating is available; seats will be assigned on a first-come first-served basis).
- Half-day “intensives” on Wednesday afternoon (pre-registration is required and limited seating is available; seats will be assigned on a first-come first-served basis). More than 30 workshops on Tuesday and Wednesday morning.
- Off-site tours.
- An opening reception in the exhibit hall on Monday evening sponsored by the Host Committee.
- Admission to the exhibit hall.
- Admission to all workshops, general sessions and lectures.
- Lunch on Tuesday in the Exhibit Hall.

Tentative Schedule

SUNDAY, NOVEMBER 7

7:00 am – 6:00 pm

8:00 am – 4:00 pm

Registration Desk Open (Hyatt)
Pre-Conference Training Programs
(pre-registration required)

MONDAY, NOVEMBER 8

7:00 am – 7:00 pm

8:00 am – 4:00 pm

Registration Desk Open (Hyatt)
Pre-Conference Training Programs
(pre-registration required)

2:00 pm – 3:45 pm

Opening General Session
Shawn Garvin, Regional Administrator, US EPA
MaryAnn Tierney, Regional Administrator, FEMA
Frederick Bealefeld, Commissioner, BCPD
*Keynote Speaker: Sean Tuohy, Subject of
The Blind Side*

4:00 pm – 6:30 pm

8:00 pm – 11:00 pm

Recognition of Host Committee
Recognition of Conference Champions
Reception in Exhibit Hall
Networking Event Hosted by MSA

TUESDAY, NOVEMBER 9

7:00 am - 4:30 pm

8:45 am - 10:00 am

9:00 am - 3:00 pm

10:00 am - 10:30 am

10:30 am - 11:45 am

11:45 am - 1:15 pm

1:15 pm - 2:30 pm

2:30 pm - 3:00 pm

Registration Desk Open (Hyatt)
Workshop Session 1
Exhibit Hall open
Break in Exhibit Hall
Workshop Session 2
Lunch in the Exhibit Hall
Workshop Session 3
Break in Exhibit Hall (Exhibit Hall closes
at 3:00 pm)

3:00 pm - 4:15 pm

8:00 pm – 11:00 pm

Workshop Session 4
Networking Event Hosted by CSX

WEDNESDAY, NOVEMBER 10

7:00 am - 4:30 pm

7:45 am - 9:00 am

9:15 am - 10:15 am

10:15 am - 10:30 am

10:30 am - 11:45 am

11:45 am - 1:00 pm

1:00 pm - 4:00 pm

Registration Desk Open (Hyatt)
General Session with Breakfast
Workshop Session 5
Break
Workshop Session 6
Lunch on own
Half-day Intensives (pre-registration required)

Training Programs

In addition to workshops and general sessions, a variety of longer training programs, Wednesday Intensives, and off-site tours are being offered in conjunction with the conference. These training programs, tours and Wednesday Intensives require advance registration as limited seating is available. Please make your choices when you complete your registration form. Certificates for training programs will be mailed after the conference based on verification of completion. Please note times and dates vary for each program. All training programs are included in the registration fee and are still available.

RESPONDING TO TANK TRUCK EMERGENCIES

Barry Lindley, DuPont Emergency Response Solutions

This class is designed for the responder who needs increased knowledge in responding to tank truck emergencies. This class covers tank truck anatomy and design, damage assessment, repair, and transloading. This class meets NFPA 472 and 29CFR1910.120(q) requirements. The class will consist of one day of classroom instruction and one day of hands-on training. Upon completion, students will be familiar with construction features of various cargo tanks and associated hazards; be able to identify and explain major factors that affect tank damage severity; know common leak points on tank trucks; understand the types of damage that may occur to tank trucks during collisions and the inspection process for damaged tank trucks.

Class Schedule: This class is a two day class.
 Sunday, November 7 8:00 am – 4:00 pm (Hyatt)
 Monday, November 8 8:00 am – 3:30 pm
 (off-site; bus departs from Hyatt)

LEADING A COLLABORATIVE TEAM

Gregg Gregory, CSP

What is the common thread between the Bubonic plague, a major hurricane and teamwork? They can all have a dramatic impact on a large number of people in a very short period of time. While teamwork may not have a direct and deadly impact, it does have an enormous affect on employees at all levels of the organization. Weak, poor or negative workplace relationships with teammates or leadership are among the top reasons employees leave a team. Do conflicts arise each time your team meets? How well do the team members relate to one another? Are they cooperative on projects? Do they work seamlessly as a cohesive group? This program will help you design a cooperative team that produces results by utilizing the most effective players to accomplish the mission in a productive timeframe. Key learning concepts include mutual accountability, team chemistry, behavior styles, the four-step team matriculation process, and the seven levels of team empowerment.

Class Schedule: This class is a half-day class.
 Monday, November 8 8:00 am – noon

MODULAR EMERGENCY RESPONSE RADIOLOGICAL TRANSPORTATION TRAINING (MERTT); TRAIN-THE-TRAINER PROGRAM

Presented by: U.S. DOE Transportation Emergency Preparedness Program

This 16-hour training program is designed to take the complex topic of a radiological response and break it down into easily understood modules. The course also includes hands-on activities with radiation detection equipment, radioactive material packaging, and “live” radiation sources to reinforce learning. Students will develop a comprehensive understanding of radioactive materials, radiological survey instruments, decontamination techniques for handling radiologically contaminated victims, and resources available to you during your response. Students who complete the 16-hour class will receive certificates from DOE and instructor material which includes supporting videos to assist you in training others in your agency. Up to 11.5 hours of continuing education hours will also be awarded. This course has been accepted by the Department of Homeland Security into the list of approved Federal training courses.

Class Schedule: This class is a two day class.
 Sunday, November 7 8:00 am – 4:00 pm
 Monday, November 8 8:00 am – 4:00 pm

CLANDESTINE METH LABS – RESPONDING TO A MOBILE LAB & CURRENT TREND UPDATE

Mick Mollica, LEARN Associates

This class will provide law enforcement officers and hazmat team members with information they need to know to identify and handle a mobile meth lab. On the first day of the class, students will work through scenarios using a mobile meth lab. Students will learn how to assess and identify a mobile meth lab, the hazards of such a lab, and how to properly respond. On the second day of the class, students will learn about a new manufacturing method that is spreading throughout the East Coast, along with other current trends.

Class Schedule: This class is a one and a half-day class.
 Sunday, November 7 8:00 am – 4:00 pm
 Monday, November 8 8:00 am – noon

MEET THE PRESS WITH SUCCESS!

Nancy Webster White Horse Communications

Your most powerful and effective communications tool remains the media. Successful media interviews do not happen by chance, they result from skill. This program will discuss the valuable tips and present the practical techniques that are critical for your communications success. Learn how to quickly prepare and powerfully deliver effective media interviews in print and on TV.

Attendees will learn how to:

- Anticipate the media’s questions
- Quickly prepare effective messages
- Control the focus of the interview
- Avoid being misquoted
- Overcome nervousness
- Handle difficult Q & A’s
- Effectively deal with aggressive reporters

Presented by a media expert with over 18 years experience in the emergency response industry, the program will be focused and fast-paced. Recent news video clips involving various emergency response officials will be shown to provide real-world training examples. This program is critical for anyone who may be required to speak to the media.

Class Schedule: This is a half-day class.
 Monday, November 8 8:00 am – noon

EFFECTIVE EMERGENCY MANAGEMENT FOR INDUSTRIAL FACILITIES

Brian Bennett, EHS Excellence Consulting; Chief, Iselin NJ FD

Surely you want to mitigate an emergency at your facility in the safest, quickest, and most cost efficient manner possible. But are you really sure you know what emergency responders expect from your incident management team if they respond to your facility? Is your incident management team ready to “speak the same language” as the responders and develop an effective incident action plan consistent with their general operating guidelines?

This workshop is specifically customized for industrial facilities to provide practical, ready to use insight and tips on how your incident management system can be fully coordinated and integrated with that of the local emergency responders to ensure a favorable outcome for all stakeholders.

Topics covered include: Strategy and tactics; developing incident priorities; NIMS; emergency response operations; incident management roles and responsibilities; pre-emergency planning; and drills and exercises.

The instructor for this workshop is a seasoned municipal Fire Chief, Deputy Emergency Management Coordinator, and a former Director of Emergency Response for a chemical manufacturing company.

Class Schedule: This class is a half-day class.

Monday, November 8 8:00 am – noon

CAMEO FOR ALL HAZARDS EMERGENCY PLANNING

Lt. Alan Finkelstein, Strongsville (OH) Fire Dept. - Adjunct Instructor for Louisiana State University's CAMEO program

This workshop will provide instruction on downloading, installing, and using the CAMEO Suite. CAMEO is a free suite of programs co-developed by the USEPA and NOAA. Although it was originally developed for hazmat facilities, responders and planners, its use has been extended to assist communities in doing all-hazard planning. We will explore the data available, development of a data entry program, and do some scenario-based, hands-on exercises. Please bring a laptop (must have administrator rights to install software).

Software and other materials will be provided by the instructor. Participants may also download the software from the EPA CAMEO Website (<http://www.epa.gov/OEM/cameo/>) prior to the session.

Class Schedule: This class is a half-day class.

Monday, November 8 8:00 am – noon

INTRODUCTION TO CHEMISTRY FOR FIRST RESPONDERS

US EPA Region III and Weston Solutions

This 8-hour course is designed for first responders with hazardous materials operations level training. This course includes both class room and hands-on demonstrations and instruction. The course discusses chemistry and chemical principles in terms of practical applications for first responders. Upon completion of the course students will be able to discuss chemical definitions, chemical and physical property terms, chemical nomenclature and how these chemicals interact with each other and the environment. Students will also be able to identify and interpret the types of hazards and response information available from key resources and apply this information for the purpose of hazard analysis. Modules include Introduction to Hazmat Chemistry, Flammable Liquid, Gases, and Explosives, Corrosives, Oxidizers, and Reactivity and Incompatibility of Chemicals.

Class Schedule: This class is a one day class.

Tuesday, November 9, 8 am – 5:00 pm (off-site at Baltimore City Fire Department Training Academy; bus departs from Hyatt; attendees will return to Hyatt for lunch)

UNDERSTANDING AND RESPONDING TO MERCURY INCIDENTS

Bob Swann, MD Dept. of the Environment, Emergency Response Division

This class is for the first responder as well as the Haz Mat technician. Students will learn about the sources of mercury, unique properties of elemental mercury, and its behavior in a spill situation. The course will also cover generally accepted procedures and protocols for dealing with both small and large spills, while recognizing that a quarter gallon of mercury is a very large spill. Students will have the opportunity to become acquainted with mercury through hands-on activities..

Class Schedule: This class is a half-day class.

Tuesday, November 9 8:45 am – 11:45 am

RESPONDING TO CORROSIVE EMERGENCIES

Barry Lindley, DuPont Emergency Response Solutions

This class is designed to teach the first responder how to implement a response to hazardous materials incidents involving corrosive materials. This class meets NFPA 472, and 29CFR1910.120(q) requirements. Upon completion, students will be able to distinguish between acids and bases; determine neutralizations of corrosive materials; discuss the difference between fuming acids and normal acids and the decontamination techniques for incidents involving corrosives.

Class Schedule: This class is a half-day class

Tuesday, November 9 1:15 pm – 4:15 pm

(Hyatt for lunch)

OFF-SITE TOUR

SUNDAY, NOVEMBER 7

(bus departs Hyatt at 12:30 p.m.; bus departs from Annapolis at 4:00 p.m.)

US NAVAL ACADEMY, ANNAPOLIS

The tour will highlight life at the U.S. Naval Academy--past and present. Established in 1845, the Academy is rich in history and tradition. The tour includes Lejeune Hall, Dahlgreen Hall, Bancroft Hall, Tecumseh Court, Herndon Monument, the main Chapel, and the crypt of John Paul Jones, the Revolutionary War naval hero. The guided tour will last one hour and 15 minutes, followed by self-guided time in the Visitor Center. The state-of-the-art Visitor Center, which overlooks Annapolis Harbor and the Chesapeake Bay, features an Information Center, free educational film, Graduates in Space and John Paul Jones exhibits, and a Sample Midshipman Room, as well as a tax-free Gift Shop. The centerpiece of the Graduates in Space exhibit is the Freedom 7 space capsule, flown into space in 1961 by Naval Academy graduate Alan B. Shepard, Jr.

Note: Additional tickets for spouses/guests are available for \$10.

Wednesday Intensives

PRIVATE SECTOR COUNTERTERRORISM AWARENESS

Presented by Dept. of Homeland Security/Office of Infrastructure Protection

This workshop is designed to improve the knowledge of private sector managers and directors by providing exposure to key elements of the improvised explosive device (IED) threat, soft target awareness, and surveillance detection methods. The workshop illustrates baseline awareness and prevention actions that reduce vulnerabilities to counter the threat along with collaborating information-sharing resources to improve preparedness. This designed approach better enables the owners and operators of critical infrastructure and key resources to deter, prevent, detect, protect against, and respond to terrorist use of explosives in the United States.

The workshop will provide the participants an opportunity to:

- * Gain insight into terrorists' objectives and trends related to tactics, techniques, and procedures
- * Recognize potential indicators and warnings of terrorist activity
- * Receive an overview on current types of IEDs being used
- * Review theory and practices for Threat/Vulnerability Assessment, Protective Measures, Surveillance Detection, and Incident Management
- * Gain an understanding of the current terrorist threat and efforts underway by DHS and partner agencies to address these threats and resources available to assist the private sector

Note: This class is offered at no cost. Those wishing to only attend this class are not required to pay the conference fee but must pre-register by downloading and faxing/mailling a registration form.

Class Schedule: This class is a one day class.

Wednesday, November 10 9:15 am – 5:00 pm

HAZMATIQ 4-STEP SYSTEM

Joe Gorman and Cris Aguirre, HazMat IQ

Traditional HazMat response is founded in the principles of industrial hygiene, organic chemistry, and inorganic chemistry. While these foundations are valuable in the right setting, HazMatIQ has revolutionized first responder training by turning the focus away from mastering textbooks and onto the critical knowledge needed to make a simple decision: Can I make entry to effectuate a rescue?

To do this, a first responder needs to understand the environmental hazards and the required personal protection equipment. HazMatIQ training streamlines the size-up process and enables responders to maximize their response efficiency and effectiveness. The HazMatIQ 4 Step System is a response tool that incorporates a series of easy to understand job aids called Smart Charts. These charts enable responders to quickly assess risk and make a proper decision on how best to mitigate an incident. This system coaches responders through a process that virtually eliminates information overload.

The system incorporates the following: Step 1) Revolutionary Above the Line/Below the Line chemical size up using only the chemical name. This process works with every possible chemical. Step 2) Streamlined chemical research process based on only seven (7) chemical and physical properties. Step 3) Detection device selection: CGI, PID, FID, pH paper, Temperature gun, KI paper, etc. Step 4) Accurate PPE selection: Level A, Level B or SFPC (bunker gear). Gone are the days when Level A was erroneously donned "just to be safe." HazMatIQ enables the user to correctly match protective ensembles with environmental hazards.

HazMatIQ system also incorporates training on how to safely and efficiently respond to unknown chemicals, mixtures, or chemical reactions when there is no information on chemical and physical properties available.

Class Schedule: This class is a one day class.

Wednesday, November 10 9:15 am – 5:00 pm

DISASTER PREPAREDNESS AND RESPONSE FOR NURSES

Devin Terry, MSN, APN, RN, ACNS-BC; Shannon Finley, MSN, RN

University of Arkansas for Medical Sciences, College of Nursing

This course is designed to introduce participants to American Red Cross Disaster Services and to learn how to support this critical mission during a disaster. Participants will learn the "field" side of First Aide and acquire the knowledge and skills necessary to assist in an acute care situation. The Health Services Response module is designed to orient licensed health professionals to the roles and responsibilities of a Disaster Health Services volunteer when working on behalf of the American Red Cross to meet the disaster-related health needs of clients. The Shelter Operations module is designed to give participants an overview of the American Red Cross policies and procedures for setting up, running and closing a shelter during a disaster.

Course activities provide participants an opportunity to work as members of a Red Cross Health Services team to resolve complex problems. These activities require participants to apply their professional knowledge, experience and critical thinking abilities to the work-related challenges experienced by Red Cross workers who provide immediate assistance to clients in the aftermath of a disaster. The course includes lecture and group exercises.

All participants MUST bring a copy of their current RN licensure and CPR card to keep on file with their training record. These records will be kept on file with the local Central Maryland Chapter of American Red Cross.

Class Schedule: This class is a one day class.

Wednesday, November 10 9:15 am – 5:00 pm .

SAFE RESPONSE TO RAILROAD TANK CAR EMERGENCIES

Presented by CSX Transportation

This course will consist of both lecture and hands-on training at the CSX Railyard utilizing the CSX Safety Train. The course will remove the guesswork and help you understand the right way and the safe way to respond to a railroad incident. Upon completion of the course, you will have an understanding of safe practices for working on and around railroad equipment, tank car markings and stenciling, tank car construction, and various valves and safety appliances. Observers are welcome and do not have to participate in the hands-on training. Students wishing to participate in the hands-on portion must bring with them the following personal protective equipment: Nomex coveralls, hardhat, safety glasses, safety boots, or structural firefighter protective equipment.

Class Schedule: This class is a one day class.

Wednesday, November 10 9:15 am – 5:00 pm
(off-site; bus departs from Hyatt)

PRINCIPLES OF CHEMICAL EMERGENCY PREPAREDNESS (CEP)

Francesca DiCosmo, Richard Fetzer, and Gerry Heston--US EPA

The U.S. Environmental Protection Agency has developed a training course designed to assist decision-makers and other stakeholders in the preparation of response plans for emergency events associated with the release of hazardous chemicals. During this four-hour training session, participants will learn about the CEP Planning Process (including steps in the process and what to consider in developing a CEP plan), The Safety Continuum (including roles and responsibilities), and Organizing CEP Planning Groups (including identifying the stakeholder in your planning area). The training will include a short interactive and participatory exercise. Certificates will be provided for completion of the course.

Class Schedule: This class is a half-day class.

Wednesday, November 10 1:00 pm – 4:00 pm
(off-site; bus departs from Hyatt)

IMPROVING YOUR EXERCISES - TURN YOUR EXERCISE UPSIDE DOWN

Steven Fruchtmann
BDR, an SAIC Company

Exercises are the best way to ensure preparedness at the tactical response, emergency management and senior leadership levels. In most comprehensive programs, exercises build successively from discussion-based exercises to full scale exercises. Instead, bring your exercise program to the next level by turning it upside down and utilizing technology and reverse sequencing to engage participants, test tactical operations, reflect on those operations at the policy and management level, and connect senior leadership into the preparedness process. Exercises can be tiered so play action in each can be used as injects in the next. This dynamic atmosphere and approach provides the ability to meet specific operational goals that grant competence in all emergency functions by creating opportunities to learn at every level, using video clips from tactical drills to create realistic, personalized newscasts that stimulate and animate discussion-based exercises.

Class Schedule: This class is a half-day class.

Wednesday, November 10 1:00 pm – 4:00 pm

BIOLOGICAL AND CHEMICAL AGENT DETECTION

Brian Oswalt, QTL Biosystems

This workshop will provide an overview of the history of biological warfare and an examination of specific agents and detection methods. In addition, there will be a general review of instrument technology for vapor detection of chemical warfare agents, toxic industrial chemicals and their applications as applied in the field using wireless technology for data communication and event management. The review will also discuss next generation hybrid technologies and their impact on the ability to improve the threat assessment.

Class Schedule: This class is a half-day class.

Wednesday, November 10 1:00 pm – 4:00 pm

FBI BRIEFING FOR EMERGENCY MANAGERS AND FIRST RESPONDERS

Steven Shepherd, Special Agent/
Maritime Liaison

Federal Bureau of Investigation

This presentation will focus on three topics: The Threat of Terrorism, The WMD Threat, and Maritime Terrorism.

The Threat of Terrorism

Looking back historically where it started domestically and its global impact and leading into the ideologies of terror groups and considerations for preparedness and response. Discussing international and domestic terrorism will show their differences and their similarities.

The WMD Threat

The FBI's Headquarter Division has developed a formative counter-measure to the WMD threat with an emphasis on multi-jurisdictional prevention and far reaching investigative capability. The FBI has also created a conduit between the local first responder and the FBI's network of global subject matter experts. Case studies will focus on recent East Coast cases.

Maritime Terrorism

Maritime threat considerations--whether the ship or port is the target or method of access this threat is a rapidly growing revelation. Mariners will tell you to get a fix on your destination before plotting the course. Who is charting the plan, what is the end game for maritime security, and how will the plan get us there.

Class Schedule: This class is a half-day class.

Wednesday, November 10 1:00 pm – 4:00 pm

OFF-SITE TOUR

United States Naval Academy, Annapolis, MD - Sunday, November 7
 (bus departs Hyatt at 12:30 p.m.; bus departs from Annapolis at 4:00 p.m.)

Cancellation Policy: All cancellations must be in writing and sent by mail or fax to above address or fax number. After October 9, no refunds will be made.

Exhibitor Information

Join us in at Baltimore's Inner Harbor for a prime opportunity to build or strengthen your connections with key decision makers in the emergency preparedness and prevention field. Our conference will bring you face to face with many of those often hard to reach customers. Plus we've built into the schedule plenty of time for attendees to visit the exhibit hall including:

- Dedicated exhibit hall hours on Monday from 4 to 6:30 p.m. with a fantastic opening reception.
- Exhibit hall hours on Tuesday from 9 a.m. to 3 p.m. including two half-hour breaks and lunch for all attendees in the exhibit hall.

ADVANTAGES OF EXHIBITING

Exhibitor registrations include:

- 8 feet (deep) x 10 feet (wide) carpeted display area, one 6' draped table, back wall and side rail drapes, two chairs, wastebasket and a booth identification sign.

Electricity and phone lines will be available at an additional charge; forms for these services will be included in the exhibitor service kit.

PLUS...

- Two full conference registrations will be included in every exhibit space. Exhibitors are an integral part of the conference and are encouraged to participate in all workshops, general sessions, and special networking events. Additional exhibit hall only badges are available for your staff who will be staffing your booth and not attending workshops.

- A 50-word description of your company's products or services and contact information will be included in the conference program to be given to every attendee allowing you to update old clients on new developments while at the same time attracting new prospects.
- A link to your company's Web Site from the 2010 Conference Web Site will be created heightening your company's recognition among attendees and allowing attendees to instantly learn more about your products and services. We also encourage you to increase booth traffic by placing a link on your Web Site to the Conference Web Site.
- Ten free exhibit hall only passes will be given to each exhibitor for distribution to current or potential customers. Additional passes are available upon request at no cost.
- A post-conference attendee list with full contact information will be given to all exhibitors so you can follow-up with attendees after the conference.
